IT

CURRENT TRENDS AND CHALLENGES FOR IT

Artificial Intelligence (AI) and machine learning

Usage of AI is accelerating, and such offers new possibilities for mid-sized companies to optimize their processes or to develop new business models.

Cloud Computing

Migrating data into the cloud allows companies to make their IT infrastructure more flexible and scalable which is especially appealing to medium-sized companies.

T Sustainable IT (Green IT)

Awareness of environmentally friendly IT solutions that fulfill legal requirements while minimizing cost is growing rapidly.

Skilled labor shortage

Shortage of skilled labor in the IT industry prohibits mid-sized companies from keeping pace with technology developments.

Information security / Cybersecurity / Compliance

Growing digitization and complexity in IT require the development of very robust Information-Security-Management-Systems (ISMS) to prevent cyber attacks as well as fulfill legally required data security and compliance requirements.

Digitization of business processes

The necessity to digitize business processes is driven by the need to stay competitive. This requires investments and organizational changes.

EXPERTISE
F&P

IT Solutions on
demand

PRACTICE ORIENTED SOLUTIONS ACROSS ALL FUNCTIONS
