Supply Chain Management

# CURRENT TRENDS AND CHALLENGES IN THE FIELD OF SCM

- Shortage of skilled people / company succession
  - Effects of demographic change and inadequate education and training
  - Lack of preparation on the side of candidates, unclear structures and centralized know-how at companies
  - Digitization / Artificial Intelligence
  - Fears and ignorance of managers
  - Lack of data quality as well as security and privacy concerns
- Sustainability
  - Adaption of existing processes as well as data collection and their quality
- Supply chain resilience
  - Protectionism and customs policy
  - Risk management
- Resources management / Process optimization
  - Target figures and indicators as well as capacity and personnel planning.
  - Efficient and robust processes
- Competitiveness and cost pressure
  - Energy- and raw material prices next to pressure on margins
